Childhood Immunisation in Australia

Introduction

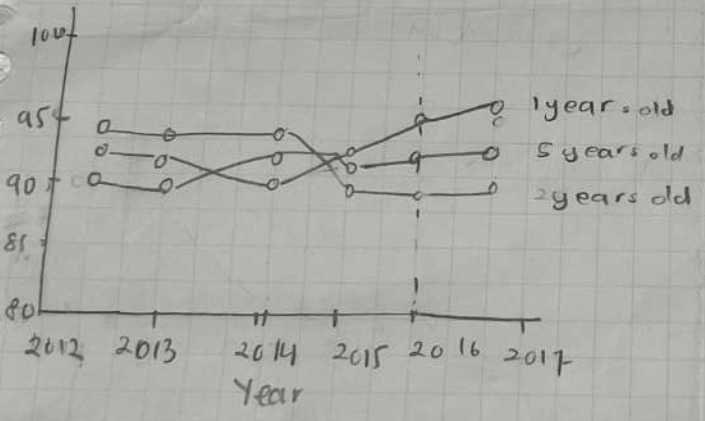

For years, Australia was one the best-vaccinated coverage in the world. However, immunisation coverage has started to slip and has never reached national target of 95%.

Childhood immunisation

① Australia's ranking across global

② Australia Childhood immunisation progress

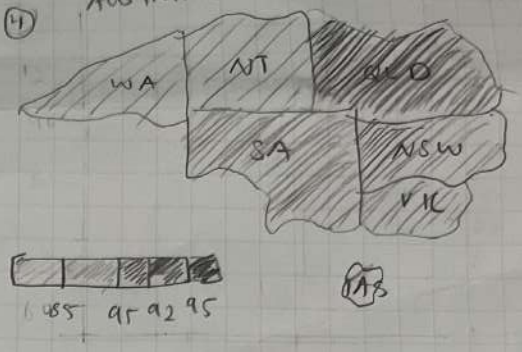

③ Unimmunised children

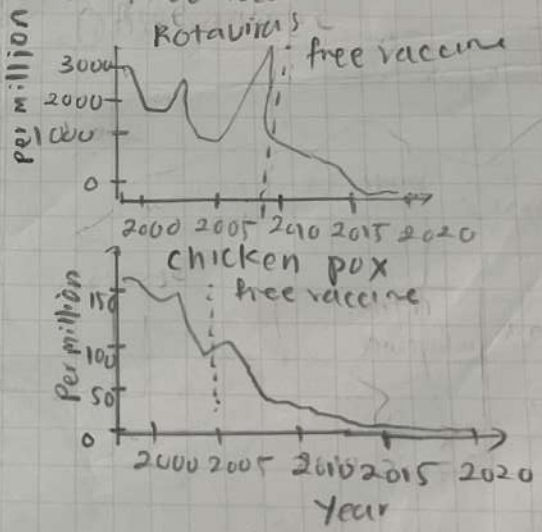

1 ● = 20 children

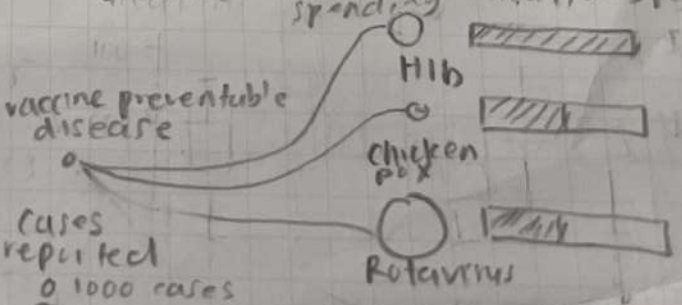

④ Childhood coverage varies Across Australia

⑤ Hospital admission fell after free vaccine

⑥ Number of vaccine preventable disease and health health spend

Conclusion

- Coverage fell since 2020
- Underimmunise children lived in big cities
